

Pelangio Exploration Inc. - Manfo Property - Nfante West Gold Zone

As at October 31, 2011

Intersections are calculated with a 0.2 g/t cut-off and a maximum of five-metres of dilution, unless otherwise indicated.

Intersections containing high-grade intervals that have been cut to 30 g/t are stated in italics and grey shaded cells following the uncut intervals.

Intervals over 20 gram-metres are in bold.

Local Grid Section	DHID	From (metre)	To (metre)	Interval (metres)	Au (g/t)	Gram-Metres	Hole Length (metres)	Az (°)	Dip (°)
